

DANIYAL SAQIB

Full Stack & AI Engineer | CS Student @ UMT

Lahore, Pakistan | +92 330 8068062 | daniyalsaqib70@gmail.com | linkedin.com/in/daniyal-saqib-012142335 | github.com/daniyalsaqib | daniyalsaqib.me

PROFESSIONAL SUMMARY

Full-stack and AI engineer with hands-on experience building agentic workflows, banking intelligence systems, and web applications using React/Next.js, FastAPI, PostgreSQL, Python, and JavaScript. Former COO who restructured a 20-person technical team into a focused 10-person unit, combining engineering execution with operational leadership.

EXPERIENCE

IT Intern | Allied Bank Limited (ABL)

Aug 2026 - Sep 2026 | Lahore

- Authored the SRDS and engineered an agentic Outreach & Fraud Operations Suite spanning fraud flagging, cold outreach, deterministic charity-consent workflows, and audit logging.
- Built a statement and policy intelligence pipeline for statement Q&A, subscription and fee anomaly detection, source-cited policy retrieval, and a C++ banking operations engine.

Chief Operating Officer (COO) | Axiolink Systems

Dec 2025 - Jul 2026 | Lahore

- Restructured a 20-person technical team into a focused 10-person unit, improving delivery accountability, sprint predictability, and cross-team communication.
- Partnered with the CTO to decompose product roadmaps, prioritize sprint backlogs, delegate technical deliverables in Jira, and support developer talent acquisition.

Full-Stack Intern | WiMetrix

Aug 2025 - Oct 2025 | Lahore

- Engineered a real-time digital clock synchronization module in JavaScript, contributed to responsive interfaces, and followed Git/GitHub branching and review workflows.

TECHNICAL PROJECTS

ABL Outreach & Fraud Operations Suite

Python | FastAPI | Agentic Workflows

- Architected a layered multi-agent banking system with fraud explainability, outreach automation, deterministic state transitions, bounded retries, and audit logging.

ABL Statement & Policy Intelligence

Python | FastAPI | RAG | Vector Search

- Built a multi-agent pipeline for statement Q&A, recurring subscription and fee anomaly detection, and policy retrieval grounded in official guidance with source citations.

Networking CRM System (In Development)

Next.js | PostgreSQL | Leaflet | TypeScript

- Building a geospatial contact intelligence system that organizes and surfaces a 1,300+ professional network by proximity, company clusters, and industry tags.

Inbox Copilot - SOFTEC'26 Hackathon

Python | Streamlit | FastAPI | Groq API

- Built with Team Panic Pointers at FAST-NU Lahore in a 6-hour sprint; classifies opportunity emails, extracts structured fields, and computes personalized priority rankings.

PatientZero Prototype

C# | Unity3D

- Built a playable horror game prototype with custom C# behavior logic, spatial triggers, and collision systems with two teammates for a Game Development elective.

EDUCATION

BS Computer Science | University of Management and Technology (UMT)

Oct 2023 - Jun 2027 (Expected) | Lahore

CGPA: 3.00 | Relevant Coursework: OOP, Data Structures & Algorithms, Data Mining, Game Development

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++, Java, C#, SQL

Web & AI: React, Next.js, FastAPI, Streamlit, Node.js, HTML5/CSS3, Agentic AI Workflows, RAG

Databases & Tools: PostgreSQL, Git, GitHub, Jira, Unity

Core: Full-Stack Development, Data Structures & Algorithms (DSA), OOP, Agile/Scrum

LEADERSHIP & ACTIVITIES

- Co-Director Marketing - UMT Entrepreneur Society (Aug 2026 - Present)
- Marketing Lead - TEDx UMT (Jul 2026)
- Web Development Team Member - Google Developer Group (GDG) UMT (Nov 2025 - Sep 2026)
- Speed Programming Team Member - UMT ACM Student Chapter (Nov 2025 - Present)
